## FOR IMMEDIATE RELEASE

### **Hamptons grown Higher Source launches new luxury Cannabinoids product brand**

Founders of East End Long Island startup launch company showcasing new products from Hampton Cannabis Expo

Meet the founders as they launch Higher Source a new cannabinoids health and wellness line. Licensed through New York State as a distributor and retailer Higher Source, Cannabinoids, is a Long Island based Luxury Cannabinoids brand product line. The products are made available in retail stores, through pop-ups and online at: <http://www.HigherSourceCan.com>.

Connect with the founders, try and buy tinctures, creams and preview additional upcoming products on August 20th at the Hampton Cannabis Expo 2022, located at The Clubhouse on 174 Daniels Hole Rd in East Hampton, NY.

Recent changes have been making cannabinoids a hot topic and the founders are excited to make available this new offering promoting new standards in quality and consistency.

*" Globally we have seen a tidal-wave of positive medical research showing the health and wellness benefits of CBD and THC. We are seeing a cultural shift, new social acceptance and attitudes around the use of Cannabis."* Says founder Angelo Kakaris.

The Focus is on offering optimal delivery methods and products designed both with and without THC. The premiere products include full spectrum tinctures and creams and new products are planned to be launched throughout 2022.

New York and Long Island continue to further Cannabis and Cannabinoid businesses' supporting them with progressive legal and regulatory frameworks and a public outreach campaign called "Cannabis Conversations". Co-Founders, Angelo Kakaris, Ryan Pearce and Stas Rutkowski feel these conversations are critical and venues like Hamptons Cannabis Expo are increasing awareness and providing an opportunity to join in the conversation with top thought leaders and powerhouses in the space.

It's been a groundbreaking year with sweeping changes and acceptance of the growing cannabis industries. Many are uninformed that somewhat quietly on April 1st of 2022 the House passed a landmark marijuana legalization bill legalizing marijuana nationwide, eliminating criminal penalties for anyone who manufactures, distributes or possesses the substance. This did not move forward in the Senate and the conversation goes on.
